Returns under the Accounts and Statements Rules

Supplementary Notes

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

Appendix 9.1

0201 Modification to the provisions of the Accounts and Statements Rules

The Financial Services Authority, on the application of the firm, made a direction under section 148 of the Financial Services and Markets Act 2000 in June 2010. The effect of the direction is to modify the provisions of INSPRU 3.1.35R and IPRU (INS) Appendix 9.3 so that a more appropriate rate of interest may be used for its assets taken in combination.

The Financial Services Authority, on the application of the firm, made a direction in December 2008 under section 148 of the Financial Services and Markets Act 2000. The effect of the direction is to enable the firm to take into account 'reversionary interests in land' for the purposes of determining the yield and internal rate of return on assets in accordance with INSPRU 3.1.34R and 3.1.39R respectively.

The Financial Services Authority on the application of the firm, made a direction in April 2009 under section 148 of the Financial Services and Markets Act 2000. The effect of the direction is to modify the provisions of INSPRU 2.1.22R so that a group of persons is not closely related by reason of the relationship described in INSPRU 2.1.40R(1) if control is exercised by, or on behalf of, HM Treasury.

Net admissible assets	309,279	220,023
Subordinated debt – Form 3 line 52	65,000	65,000
Intergroup loan – Form 3 line 52	50,000	50,000
Excess lower tier two capital – Form 3 line 63	-	(4,896)
Total capital resources after deductions – Form 3 line 79	424,279	330,127

0308 Outstanding contingent loans and any other charges on future profits

At the end of the financial year, the total amount of contingent loan drawn down from the immediate parent undertaking is £51,679,000 (being the balance drawn down at 31 December 2009 of £421,679,000 less a repayment during the year of £370,000,000). As at the end of the financial year, the statutory valuation of the loan was £37,775,000 and the amount included in Form 14 line 35 (Debenture loans – unsecured) was £nil. The difference of £37,775,000 is reported in Form 3 line 94 (Outstanding contingent loans), which represents a potential charge against future profits not recognised in Form 14. Further detail is provided in note 1402 (c).

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

Appendix 9.1 (continued)

In April 1998 the insurer entered into a securitised loan agreement which raised £260 million (£140 million of 7.39169% Class A1 Limited Recourse Bonds due 2012 and £120 million of 7.5873% due 2022). The block of business securitised consists of a portfolio of unit-linked, unitised with-profit and capital account policies. Under the securitised loan agreement interest and principal payments are made out of surplus emerging (as defined in the agreement).

As at the end of the financial year, the undischarged liability is £140,240,000 (£260,000,000 less £113,901,000 capital repayment less a £5,859,000 impairment on the Class A2 Limited Recourse Bonds). Of this amount £57,397,000 is reported in Form 3 Line 95 (Any other charges on future profits), which represents a potential charge against future profits not recognised in Form 14.

Further details are disclosed in paragraph 8 of the "Abstract of Valuation Report" in Appendix 9.4.

0310 Net valuation differences in Form 3

	2010 £000	2009 £000
Securitised loan valuation difference	57,397	50,735
Contingent loan valuation difference	37,775	67,502
Liability valuation difference	(89,376)	(208,492)
Net valuation difference	<u>5,796</u>	<u>(90,155)</u>

0313 Reconciliation of profit and loss and other reserves in Form 3

	£000
Profit and loss account and other reserves at 1 January 2010 - Form 3 line 12	335,678
Profit and loss account (non-technical account) - Form 16 line 59	(296,050)
Capital Contribution	370,000
Original earmarked assets	(28,738)
Shareholder equalisation fund	58,099
Return of capital contribution	<u>(103,357)</u>
Profit and loss account and other reserves at 31 December 2010 - Form 3 line 12	<u>335,632</u>

The original earmarked assets and shareholder equalisation fund refer to capital support held by the long-term fund.

The shareholder equalisation fund was created to compensate shareholders for lost support charges resulting from a restructure of the Company in 2010.

The return of capital contribution consisted of a £34m loan to Pearl Group Holdings (No.2) Limited, £40m cash and £29m of equities.

1100 Calculation of long-term insurance business capital requirement – premiums amount and brought forward amount

Form 11, calculation of long-term insurance business capital requirement – premiums amount and brought forward amount, has not been included, as the insurer satisfies the de-minimis limit.

Appendix 9.1 (continued)

1200 Calculation of long-term insurance business capital requirement – claims amount and result

Form 12, calculation of long-term insurance business capital requirement – claims amount and result, has not been included, as the insurer satisfies the de-minimis limit.

1301 & *1308* Unlisted and listed investments

Included within Form 13 are the following amounts:

	Long-term		Other than long-term	
	2010 £000	2009 £000	2010 £000	2009 £000
Unlisted investments valued in accordance with the rules in GENPRU 1.3	2,592	2,791	6,002	31,875
Listed investments valued in accordance with the rules in GENPRU 1.3 and which are not readily realisable.	118,179	142,034	-	-
Collective investment schemes, as specified in instruction 5 to Form 13	62,613	68,187	54,035	-
Total	183,384	213,012	60,037	31,875

The above amounts in respect of unlisted investments and listed investments that are not readily realisable fall within any of lines 41, 42, 46 or 48 (Other financial investments) of Form 13. Units or other beneficial interest in collective investment schemes, as specified in instruction 5 to Form 13, are reported within Form 13 line 43 (Holdings in collective investment schemes).

Included within collective investment schemes are the following assets:

	Long-term		Other than long-term	
	2010 £000	2009 £000	2010 £000	2009 £000
Henderson Retail Warehouse Fund	11,493	12,355	-	-
Henderson Central London Office Fund	42,670	44,119	-	-
Henderson Shopping Centre Fund	8,450	9,030	-	-
Henderson CASPAR Fund	-	2,683	-	-
Ignis Fundamental Solutions Fund	-	-	21,249	-
Ignis Strategic Solutions Fund	-	-	32,786	-
Total	62,613	68,187	54,035	-

1305 & *1319* Counterparty limits

- The investment guidelines, operated by the insurer, limit exposure to any one counterparty by establishing limits for each type. These limits are set by reference to the individual and aggregated limits set out in the market and counterparty limits in Chapter 2.1 of the Prudential Sourcebook for Insurers.
- The maximum permitted exposure to a counterparty other than an approved counterparty during the year was 5% of the business amount, calculated in accordance with Chapter 2.1 of the Prudential Sourcebook for Insurers. The exceptions to this are for strategic investment opportunities where, in order to achieve a target asset mix or diversification, excess exposures may be permitted for a short duration. Where these excess exposures persist for the long-term, modifications may be sought.
- There were no breaches of these limits during the financial year.

Appendix 9.1 (continued)

1318 Other asset adjustments

Included in Form 13 line 101 (Other asset adjustments) for 2010, are the following amounts:

	Long-term	Other than long-term
	£000	£000
New earmarked assets	(65,000)	65,000
Reclassification of other debtors	(1,388)	40
Original earmarked assets	(48,213)	48,213
Shareholder equalisation fund	(58,099)	58,099
	<u>(172,700)</u>	<u>171,352</u>

Included in Form 13 line 101 (Other asset adjustments) for 2009, are the following amounts:

	Long-term	Other than long-term
	£000	£000
New earmarked assets	(65,000)	65,000
Reclassification of tax creditor	(3,635)	(8)
Reclassification of intra fund balance	(1,717)	(872)
Original earmarked assets	(76,951)	76,951
Reclassification of interest payable on new earmarked assets	(911)	-
	<u>(148,214)</u>	<u>141,071</u>

The original earmarked assets and new earmarked assets refer to capital support held by the long-term fund.

1401 & *1501* Provision for reasonably foreseeable adverse variations

The assets of the insurer are valued at fair value. Consideration is given to any assets where the valuation requires judgement or where the asset is considered to be illiquid (with a lock up period of greater than one year) or is valued using an internal model. These assets are subject to the rules set out in GENPRU 1.3.30R to GENPRU 1.3.33R which are applied to all identified assets. In assessing the need for a provision the following assumptions have been made:

The insurer, as part of its asset allocation strategy, invests in assets which are less liquid or where judgement is required within the valuation. The asset liability management process monitors liquidity on a monthly basis and ensures that there is sufficient liquidity at all times. A provision is established for less liquid positions.

No additional provisions have been identified.

1402 & *1502* Additional liability details

- (a) No charge has been made on the assets of the insurer.
- (b) The total potential liability to taxation on capital gains, which might arise if the insurer were to dispose of its long term insurance business assets, is £nil (2009: £nil). In accordance with FRS 19, the discounted value of £nil (2009: £nil) has been recognised and included within Form 14 line 21 (Provisions – taxation) for taxation on capital gains.

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

Appendix 9.1 (continued)

- (c) The insurer has a contingent loan from the immediate parent undertaking. The loan is repayable at the shareholders' discretion if and to the extent that the actuarial function holder determines that a deficit will not arise. A deficit arises where in the actuarial function holder's opinion there would otherwise be insufficient assets to cover either statutory reserving requirements or to meet policyholder reasonable expectations. Support charges of up to 1.75% are payable out of previously accrued interest provided there is a Form 58 surplus arising. No new interest is payable under the terms of a moratorium which is in place up to 31 December 2014. There are no support charges payable in respect of the financial year ended 31 December 2010 as there is no Form 58 surplus arising during the year.
- (d) There are no guarantees, indemnities or other contractual commitments, other than in the ordinary course of its insurance business, in respect of the existing or future liabilities of any related companies.
- (e) In the opinion of the directors, there are no fundamental uncertainties affecting the position of the insurer.

1405 Other adjustments to liabilities

Included in Form 14 line 74 (Long-term insurance business - Other adjustments to liabilities) are the following amounts:

	2010	2009
	£000	£000
Positive valuation difference (see note '0310')	5,796	-
Reclassification of tax creditor	-	(3,635)
Reclassification of other creditors	(1,388)	(1,717)
Interest payable on new earmarked assets	-	(911)
Negative valuation difference (see note '0310')	-	(90,155)
Total	<u>4,408</u>	<u>(96,418)</u>

1507 Other adjustments to liabilities

Included in Form 15 line 83 (Other than long-term insurance business - Other adjustments to liabilities) are the following amounts:

	2010	2009
	£000	£000
Reclassification of other creditors	40	-
Reclassification of tax creditor	-	(8)
Reclassification of intra fund balance	-	(872)
Total	<u>40</u>	<u>(880)</u>

1601 Basis of conversion of foreign currency

Assets and liabilities denominated in a foreign currency are translated using the closing rate method. Exchange differences on opening net assets are dealt with in the profit and loss account.

1701 Derivative collateral

Our practice is to seek collateral for derivative asset positions from our counterparties as part of managing our overall credit risk. In line with IFRS accounting standards, the cash held as collateral is reported on Form 13 line 43 and an equal liability in Form 14 line 38 rather than reducing the value shown on Form 13 line 44. This balance of £77m has in consequence not been reflected as 'Variation margin' in Form 17 Line 52.

Supplementary Notes

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

Appendix 9.3

***4002* Other income and other expenditure**

Other income includes annual management income of £13.9 million (2009: £13.5 million).

***4004* Business transfers**

Included in "business transfers – out" is £1,181.7 million relating to the Part VII transfer of the SERP business portfolio to Pearl Assurance plc during the year.

Also included in business transfers is £69.3 million (2009: £119.3 million) of vesting annuities have remained within the Fund. These amounts have not been recognised as part of premiums and claims on Form 41 and Form 42 respectively but as "business transfers - in" and "business transfers - out". As these amounts are not single premiums on Form 41 they have not been included in the new business Form 46 and Form 47.

***4008* Provision of management services**

Pearl Group Services Limited has provided management services to the insurer. Ignis Investment Management Limited, Ignis Asset Management Limited and Henderson Global Investors Limited have provided investment services during the financial year to the insurer.

State Street Bank and Trust Company have provided custody and accounting, securities lending, transition management and associated services for the Ignis managed assets of the insurer for the whole of the financial year.

***4009* Material connected-party transactions**

Since 1 January 2000, the insurer has entered into a number of reinsurance treaties with Pearl Assurance plc and NPI Limited. Details of these reinsurance treaties are to be found in paragraph 9 of the "Abstract of Valuation Report" in Appendix 9.4, required by rule 9.31(a).

***4401* Basis of valuation of assets**

Investments are stated at current value at the end of the financial year, calculated as follows:

- listed investments are stated at the bid market value;
- short-term deposits are included at cost;
- other investments are shown at directors' estimates of bid market value.

***4500* & *5500* Internal linked funds**

The insurer's internal linked funds are wholly reinsured to NPI Limited and all amounts required to be shown would be zero. These Forms have, therefore, not been included in the Return.

***4803* Assumptions regarding redemption dates**

For assets that may be redeemed in full at the option of the guarantor or the issuer on specified dates, it has been assumed that they will be redeemed at the last possible date, or not redeemed in the case of a callable perpetual bond. This is consistent with recent market experience that call dates are being missed and with the market valuations.

The value of callable corporate bonds at the valuation date was £47 million. It has been assumed the sinking bonds will be redeemed according to schedules of planned redemptions provided by the investment manager. The value of sinking bonds was £185 million at the valuation date.

Supplementary Notes

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

Appendix 9.3 (continued)

***4806* Assets used to calculate investment returns in column 5 Form 48 (Yield before adjustment)**

The assets used in the calculation of the with-profit return are all assets backing asset shares excluding deposit administration, capital account and the estate fund.

***4807* Allocation of assets to column 2 of Form 48 (Economic exposure)**

A number of reallocations are made between columns 1 and 2 according to instructions 2, 3 and 4.

The following additional reallocation does not have an explicit instruction but has been made to reflect the underlying assets: £41.3 million from 14.1/24.1 (Variable interest securities) is allocated to 11.2/21.2 (Land and buildings) in respect of variable interest securities that are part of a property collateralisation. The unit trust part of the property vehicle holding is reallocated between 18.1/28.1 (Other assets) to 11.2/21.2 (Land and buildings) in accordance with instruction 2.

***4901* Credit rating agency**

Ratings shown are the weaker of ratings provided by Moody's Investors Services and Standard & Poor's Corporation, otherwise the credit ratings used were provided by Ignis Investment Management Limited.

***5104* & *5204* & *5304* Number of policyholders / scheme members**

Where a policy can have a combination of profit-sharing (conventional with-profit code 155), capital account / unitised with-profit (unitised with-profit code 525 or 535) or unit-linked (code 725 or 735) elements, it has been counted as a unit-linked policy and included in column 3 for Form 53 (Number of policyholders / scheme members – property-linked contracts), if there is a unit-linked element.

Otherwise, it has been included in column 3 for Form 51 (Number of policyholders / scheme members – non-linked contracts), if there is a profit-sharing element, or in column 3 of Form 52 (Number of policyholders / scheme members – accumulating with-profit contracts), if there is only capital account / unitised with-profit.

***5600* Long-term insurance business: index-linked business**

Form 56, long-term insurance business: index-linked business, has not been included, as the insurer satisfies the de-minimis limit.

***6001* Estimation of the insurance health risk capital component**

The gross annual office premium of Class IV business was £10,865. The insurance health risk capital component was estimated as 18% of this premium amount for consistency with INSPRU 1.1.85R.

Returns under the Accounts and Statements Rules

Statement of additional information on derivative contracts required by rule 9.29

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

- (a) During the financial year the insurer operated an investment policy for the use and control of derivatives. This policy lists the approved derivative contracts and the approved uses of derivatives, establishes procedures for introducing new contracts or uses, identifies areas of risk, and establishes a control framework for dealing, settlement and independent monitoring and reporting of derivatives.

The insurer uses derivatives in its portfolio management to hedge against market movements in the values of assets in the portfolio (reduction of investment risks), and as a means of effecting a change in exposure to different asset classes without disturbing underlying physical holdings (efficient portfolio management). In addition, the insurer uses derivatives to match liabilities to mitigate the effect of changes in market variables on its capital position.

It is the insurer's policy that all obligations to transfer assets or pay monetary amounts arising under derivative contracts are covered by cash, physical securities or other specific commitments. Consequently the insurer does not trade derivative contracts against uncovered positions, and portfolios may not be geared by means of derivatives.

The insurer controls market risks through the setting of exposure limits, which are subject to detailed monitoring and review. Sophisticated risk management systems are employed to enable exposures, risks and sensitivities to be analysed on a total portfolio basis, providing for greater control. Market and liquidity risks are reduced by requiring all futures and options positions to be backed by cash or securities.

The insurer permits the purchase of partly paid shares, subject to the unpaid capital being covered by cash, and also convertible bonds as alternatives to investment in the underlying equities.

- (b) Subject to the investment principles described above, the investment policy permits the writing of contracts, under which the insurer has a right or an obligation to acquire or dispose of assets. The portfolio manager must be satisfied that the strike price is reasonable in terms of the current portfolio and market conditions at outset in case the contract is subsequently exercised.

The investment policy for the use and control of derivatives imposes overriding provisions that the investment rationale for their use is clearly understood; that each contract is admissible in terms of the Prudential Sourcebook for Insurers (INSPRU) and that derivatives may not be used to gear a portfolio. The policy specifically excludes the use of derivatives that cannot be sufficiently well modelled using the Investment Manager's internal risk management systems, without the prior approval of the senior management of the Investment Manager.

- (c) The Company has held swaptions during 2010 which were out of the money, although all payer swaptions have a fixed rate of 6% p.a.
- (d) The insurer has not made use of any derivative contract at any time during the financial year which required a significant provision to be made under INSPRU 3.2.17R or did not fall within the definition of a permitted derivative contract.
- (e) The total value of fixed considerations received during the financial year in return for granting rights under derivative contracts was £nil.

National Provident Life Limited

Global Business

Financial year ended 31 December 2010

The persons who, to the knowledge of the Company, were controllers at any time during the financial year were:

- a) NP Life Holdings Limited;
- b) Pearl Assurance Limited;
- c) Pearl Group Holdings (No. 2) Limited (formerly Pearl Group Limited);
- d) Phoenix Life Holdings Limited;
- e) PGH (LCA) Limited;
- f) PGH (LCB) Limited
- g) Phoenix Group Holdings (formerly Pearl Group);
- h) Xercise Limited;
- i) Xercise 2 Limited;
- j) Jambright Limited;
- k) TDR Capital Nominees Limited; and
- l) TDR Capital LLP

The persons who, to the knowledge of the insurer, were controllers at the end of the financial year were:

1. NP Life Holdings Limited

As at 31 December 2010, NP Life Holdings Limited owned 100% of the issued share capital of National Provident Life Limited and was able to exercise 100% of the voting power at any general meeting.

2. Pearl Assurance Limited

As at 31 December 2010, NP Life Holdings Limited owned 100% of the issued share capital of NP Life Holdings Limited, a company of which National Provident Life Limited is a subsidiary undertaking, and was able to exercise 100% of the voting power at any general meeting.

3. Pearl Group Holdings (No. 2) Limited

As at 31 December 2010, Pearl Group Holdings (No. 2) Limited owned 100% of the issued share capital of Pearl Assurance Limited, a company of which National Provident Life Limited is a subsidiary undertaking, and was able to exercise 100% of the voting power at any general meeting.

4. Phoenix Life Holdings Limited

As at 31 December 2010, Phoenix Life Holdings Limited owned 100% of the ordinary shares of Pearl Group Holdings (No. 2) Limited, a company of which National Provident Life Limited is a subsidiary undertaking, and was able to exercise 100% of the voting power at any general meeting.

With Profit Bond Series 6	Jul 1998 to Dec 2001	Throughout 2010
With Profit Bond Series 7	Jan 1999 to Dec 2001	Throughout 2010
Portfolio Bond Series 1	Jul 1999 to Dec 1999	Throughout 2010

Note: MVRs apply by date of each investment in the fund, not by policy date

- (2) National Provident Life Limited has not sold any reviewable protection business.
- (3) No policies have been sold in this category.
- (4) Policy fees on linked policies were increased on 1 January 2010 in line with either the Retail Prices Index, an increase of 3.06%, or National Average Earnings, an increase of 2.26%.
- (5) During the financial year, benefit charges remained unchanged on linked policies.
- (6) During the financial year, unit management charges for unitised accumulating with-profit and linked business remained unchanged.
- (7) All National Provident Life Limited's unit-linked liabilities, other than for Unilink policies, are reassured to NPI Limited with effect from 1 January 2000. As a consequence, the information in the following paragraphs relate to NPI Limited's practice.
 - (a) Units are of two main types. They are called initial and ordinary in NPIL and the corresponding types are capital and accumulation in PAUF and PAULP. LLLA has only accumulation units. The following method applies to all units.
 - (i) The creation unit price is determined by valuing the assets at the offered dealing price including all costs that would be incurred in buying assets and net of charges and deductions, if any, for tax. This total is divided by the number of units. The cancellation unit price is calculated by valuing the assets at the price at which they

could be sold and deducting the dealing costs, management charges and taxes if applicable. This total is divided by the number of units.

- (ii) The offer price is determined as the creation or cancellation price divided by 95%, plus any rounding adjustment. Units are cancelled at 95% of the offer price less any rounding adjustment. For the NPIL Pooled Managed Fund, which has a 1.75% bid-offer spread the 95% used in the calculation of the offer and bid prices, is replaced by 98.25%. Similarly, where there is no bid-offer spread the 95% is replaced by 100%.
 - (iii) Units are allocated to policies at the offer price and cancelled at the bid price.
 - (iv) The assets of the internal linked funds are valued at noon on each working day. If markets move significantly between noon and 4 pm, allowance for this market movement is made. This market adjustment is made automatically every day for LLLA business.
- (b) All internal linked funds are valued on a bid basis as the expected cash flows are negative for all asset categories. The valuation includes the income since the last valuation and allowances for tax on income and realised and unrealised capital gains.
- (c) Where the funds invest in unit trusts or open-ended investment companies the units are valued at the price at which NPI Limited would have been able to buy the investments. To ensure that unit holders are not subject to two sets of initial charges arrangements are in place to ensure that the unit trust investments are undertaken free of any manager's initial charges.
- (8) Tax on realised and unrealised gains and losses is accrued daily in the internal linked Life funds. Gains in Life equity funds are index-adjusted. There are no tax accruals in Pension funds.

The table below summarises the current Life tax rates and the times at which the accruals are cleared.

Fund Type	Realised Gains	Unrealised Gains	Realised Losses	Unrealised Losses
Equity	20%	19%	20%	19%

Accruals for realised gains and losses on Equity funds are cleared at the end of each month.

Accruals for unrealised gains and losses on Equity funds are cleared at the end of each financial year under the "deemed disposal" regime. The tax rate used for this purpose at the end of 2010 was 19%.

One Life equity fund has accumulated capital losses and its tax rates are currently nil.

Fixed Interest	20%	20%	20%	20%
----------------	-----	-----	-----	-----

Fixed Interest tax accruals are cleared at the end of each month.

- (9) See (8) above.
- (10) The internal linked funds receive an initial charge discount and an annual management charge rebate when purchasing, selling or holding units in collective investment funds. This ensures that the policyholder is not subject to two sets of charges.

Valuation basis (other than for special reserves)

4. (1) The general principles and methods adopted in the valuation are:

NON LINKED BUSINESS

Mathematical reserves have been determined using a gross premium method except as mentioned below.

Some non-profit assurances have been valued using the net premium method of valuation. It is unmodified, except:

- (i) Where the net premium on the valuation basis is greater than the actual office premium, the premium valued is the office premium.
- (ii) For classes of business where the difference between the office premium and the net premium is considered insufficient to cover future expenses an additional reserve has been established.
- (iii) A provision for immediate payment of claims is made.
- (iv) A reserve for policies where premiums are unpaid is held. This reserve is equivalent to the normal net premium reserve assuming premiums are paid to date, less the outstanding office premiums.

Policies on below average lives accepted at a premium for an increased age are valued as if effected at that age. Policies subject to an extra premium are valued as if effected at the ordinary premium and a further provision of one year's extra office premium is made. Liens are ignored.

For with-profit business, mathematical reserves have been determined using an individual gross premium method except for those mentioned below. The reserve for each policy is subject to a minimum of any guaranteed surrender value. Where it has been considered appropriate to do so, the mathematical reserves include additional amounts for future expenses and options and guarantees.

Visible Growth Fund, Capital Pension Plan and Cash Accumulation Plan contracts are valued by taking the liability as the amount in the deposit account. In addition there is an allowance for future expenses. For Capital Pension Plan policies, the basic reserve includes an allowance for the cost of the annuity guarantees.

Unitised with-profit and capital account policies are valued using the Discounted Value of Future Liability Outgo method. This involves calculating the same cashflows as in the gross premium method. However the method of calculating the reserve is different as the method involves accumulating backwards, starting with the last cashflow, to ensure that the reserve at the start is big enough so that no valuation strains ever occur (if the valuation assumptions are borne out in practice). The reserve for each policy is subject to a minimum of any guaranteed surrender value.

The benefits discounted are calculated on both the cash sum available at the pension date and the deferred annuity and the higher reserve is taken.

For policyholders older than 59, the reserve is the greater of the reserve calculated using the method mentioned above and that assuming immediate vesting.

If valued as a deferred annuity an additional expense reserve is included to allow for expenses after vesting in line with the present expense assumptions for annuities in payment. Also if valued as a deferred annuity the post retirement mortality is adjusted to make allowance for future mortality improvements between the year end and the vesting date in line with the Pensioner Mortality Improvement model issued by the CMI bureau.

INDEX LINKED BUSINESS

Mathematical reserves have been determined using a gross premium method.

LINKED BUSINESS

Mathematical reserves have been determined by valuing the units allocated to policies and adding a non-unit reserve for mortality and expenses. The unit-linked business is reassured to NPI Limited on an investment basis and as a result the net liabilities are equal to the non-unit reserves.

The non-unit reserve is calculated using a discounted cash flow approach. Where the projected cashflows show no future shortfall in any year there is no recourse to additional finance and no sterling reserve is required. Where the projection produces a shortfall, the discounted value of the cashflows is calculated. This is the sterling reserve required to ensure that no recourse to additional finance is required.

- (2) The following table sets out the rates of interest used for all classes of business:

Product Group	2010	2009	Product Code
Net premium basis			
Deposit administration	4.10%	4.60%	545, 555
Other pensions business	3.70%	4.20%	435
Other life business	2.96%	3.36%	100, 435
Gross premium basis			
Capital account	4.10%	4.60%	525, 535, 570
Life annuities	3.70%	4.20%	390, 395
Pension annuities	3.70%	4.20%	390, 400
Life with-profit endowments	3.28%	3.68%	120, 205
Life Unitised With-profit guaranteed (Series 1)	3.28%	3.68%	500
Life Unitised With-profit non-guaranteed	3.28%	3.68%	500
Pensions Unitised With-profit guaranteed (Series 1)	4.10%	4.60%	525, 535
Pensions Unitised With-profit non-guaranteed	4.10%	4.60%	525, 535, 570
Profit Sharing Account	4.10%	4.60%	155
Index linked annuities	1.00%	1.00%	905
Unit-linked			
Life sterling reserves	2.96%	3.36%	700, 715, 795
Pensions sterling reserves	3.70%	4.20%	725, 735, 750, 755

Notes:

For index linked annuities a net interest rate is used after allowing for RPI/LPI.

- (3) Yields on other fixed interest or variable yield securities were reduced to allow for the risks of default while retaining some margin over gilt yields for reduced liquidity of corporate bonds.

The level of the reduction was assessed by reference to long-term average default rates plus an allowance for shorter-term factors and expected deviations from the historic average. The rates assume a doubling of historical default experience, net of an allowance for 37% recovery on default. The additional 25% prudence margin applied to default deductions has been removed. An additional reserve has been held as an additional prudential allowance for default deductions. The additional reserve allows for a further increase to default deduction of 10% of the deductions as an allowance for adverse deviation.

For bank subordinated debt, the issuer's senior debt rating is used instead of an agency rating, together with a nil recovery rate rather than a 37% one (to reflect the lower priority on wind-up).

- (4) The following table sets out the mortality bases used for all classes of business:

Product Group	2010		2009		Product Code
	Males	Females	Males	Females	
Pre-vesting					
Endowment	100% AM92	100% AF92	100% AM92	100% AF92	120, 205
All other business	80% AM92	80% AF92	80% AM92	80% AF92	All others
Post-vesting/In payment					
Immediate and deferred pension annuities	92% RMV00	101.5% RFV00	92% RMV00	104% RFV00	390, 400, 905
Group GAF annuities	92% RMV00	101.5% RFV00	92% RMV00	104% RFV00	395
Life / IRS / Individual GAF annuities	100%IML92	100% IFL92	100%IML92	100% IFL92	395, 905

Notes:

1. Ultimate mortality has been used in all cases.
2. At 31 December 2010, for post-vesting mortality using the RMV00 and RFV00 tables, future mortality improvements in line with the CMI Mortality Projections model v1.0 with a 3.25% floor up to age 60 reducing to 0% at age 120 for both males and females have been assumed.
3. For post-vesting mortality using the IML92 and IFL92 tables, future mortality improvements in line with the average of CMI medium cohort and long cohort projections with a 1.5% floor for males and 1.25% floors for females have been assumed at 31 December 2010.
4. Where appropriate, additional reserves for the extra mortality that may arise from AIDS have been established. These additional reserves are calculated assuming that the additional mortality will be one-half of basis R6A; this provides a margin over the one-third recommended in the letter dated 29 October 1996 from the Government Actuary's Department. The additional reserves calculated have all been included within the reserves for the relevant individual product lines.

Male complete life expectations for annuity contracts are as follows:

Product Group	Annuities in payment		Deferred annuities: life expectation at age 65	
	Age 65	Age 75	Age 45	Age 55
Pension annuities	24.1	14.9		
Group GAF annuities	24.1	14.9		
Life/IRS/Ind GAF annuities	23.9	14.8		
Other pension deferred annuities			27.2	25.6

Female complete life expectations for annuity contracts are as follows:

Product Group	Annuities in payment		Deferred annuities: life expectation at age 65	
	Age 65	Age 75	Age 45	Age 55
Pension annuities	26.2	16.3		
Group GAF annuities	26.2	16.3		
Life/IRS/Ind GAF annuities	25.3	15.9		
Other pension deferred annuities			29.0	27.7

- (5) There are no products representing a significant amount of business that use a morbidity basis.
- (6) The expense bases are as follows:

LINKED AND NON-LINKED BUSINESS

Per policy expenses, before allowance for tax relief, were as follows:

Product Group	Premium paying		Paid up & single premium		Product Code
	2010 £pa	2009 £pa	2010 £pa	2009 £pa	
CWP savings endowments	93.77	92.88	46.81	46.37	120
CWP pensions	57.21	55.63	22.98	22.35	165
Annuity			35.03	34.70	400
UWP bond			46.85	46.41	500
UWP regular premium pension	76.57	75.85	49.61	49.14	525
UWP single premium pension			49.61	49.14	525
UWP group regular premium pension	70.42	69.75	62.14	61.55	535
UWP group single premium pension			62.14	61.55	535
UL bond			46.85	46.41	700
UL savings endowment	125.67	124.49	100.49	99.54	715

UL regular premium pension	76.57	75.85	49.61	49.14	725
UL single premium pension			49.61	49.14	725
UL group regular premium pension	70.42	69.75	62.14	61.55	735
UL group single premium pension			62.14	61.55	735

Notes:

All expenses above are shown as per policy rather than per benefit. The Scheme requires an expense charge per benefit for some products, in which case this is derived by applying the ratio of the benefit count to the policy count.

Under each policy valued on the net premium basis the reserve is increased by an allowance for future expenses for any part of the term where premiums are not payable. If there are no further premiums payable, this will be for the full outstanding term.

An allowance for expenses for the full outstanding term has also been added to other contracts not valued on the net premium basis.

If there is more than one investment fund, including unit-linked unitised with-profit and capital account, attaching to one benefit then the per policy expenses are split in proportion to the premiums payable to each fund for regular premiums and to the unit values for single premium and paid up policies.

For group life insurance provided by a separate contract the reserve of 50% of one year's premium contains a provision for expenses.

Gross Investment Expenses

Investment expenses, after allowance for VAT where appropriate, have been allowed for through a reduction to the projected unit growth rates and valuation interest rates. The table below sets out the basis point ("bp") reductions applied:

Fund	2010 bps	2009 Bps
Unit Linked	13.22	13.22
Non-Linked		
Bonds & Derivatives	6.00	6.00
Property	11.25	11.25
Equity	11.25	11.25
Cash	11.25	11.25

Notes:

Where the policy is invested in external funds, for some of these funds the projected unit growth rate is reduced by the fee payable to the external fund manager assuming mid-table performance is achieved

- (7) Unit Growth, Expense Inflation, and Policy Fee inflation rates are:

Product Group	Gross Unit Growth Rate		Expense Inflation		Policy Fee Inflation		Product Code
	(% p.a.)		Rate (% p.a)		Rate (% p.a.)		
	2010	2009	2010	2009	2010	2009	
Life business	4.60	4.79	4.60	4.80	2.70	2.90	700, 715, 795
Pensions business	4.70	4.90	4.60	4.80	2.70	2.90	725, 735, 750

- (8) As a realistic basis life firm, no allowance has been made in the determination of mathematical reserves for future bonuses in accordance with INSPRU 1.2.9R except for the following:

Product Group	Reversionary bonus rate pa	Product Code
Unitised With-profit Life series 1	3.00%	500
Unitised With-profit Pensions series 1	4.00%	525, 535

Note:

The above rates only apply where the products contain guaranteed bonus rates and are equal to the guaranteed rates. For all other products the future bonus rate is zero.

- (9) Surrender and Paid Up Rates

Product		Average lapse / surrender / paid up rate for the policy years			
		1-5	6-10	11-15	16-20
CWP savings endowment	surrender	1.90%	1.90%	1.90%	1.90%
CWP target cash endowment	surrender	1.90%	1.90%	1.90%	1.90%
UL savings endowment	surrender	0.00%	0.00%	0.00%	0.00%
UWP bond	surrender	5.30%	5.30%	5.30%	5.30%
UWP bond	automatic withdrawal	100% of current	100% of current	100% of current	100% of current
UL bond	surrender	0%	0%	0%	0%
UL bond	automatic withdrawal	100% of current	100% of current	100% of current	100% of current
CWP pension regular premium	PUP	0.0%	0.0%	0.0%	0.0%
CWP pension regular premium	surrender	0.90%	0.90%	0.90%	0.90%
CWP pension single premium	surrender	0.90%	0.90%	0.90%	0.90%
UWP ind pension regular premium	PUP	15.0%	15.0%	15.0%	15.0%
UWP ind pension regular premium	surrender	3.40%	3.40%	3.40%	3.40%
UWP ind pension single premium	surrender	3.40%	3.40%	3.40%	3.40%
UL ind pension regular premium	PUP	15.0%	15.0%	15.0%	15.0%
UL ind pension regular premium	surrender	0.0%	0.0%	0.0%	0.0%
UL group pension regular premium	PUP	33.0%	33.0%	33.0%	33.0%
UL group pension regular premium	surrender	0.0%	0.0%	0.0%	0.0%
UL ind pension single premium	surrender	0.0%	0.0%	0.0%	0.0%

Notes:

- There is an additional surrender rate of 100% on With Profit Bond Series 5 policies and some With Profit Bond Series 6 and 7 policies applying on the 10th policy anniversary (the date at which the no-MVR guarantee applies).

- (10) Other material basis assumptions:
Relief for tax applied to expenses is 20% for UK Life (excluding life annuities) business and 0% for other business. Tax on investment income is set out in the following table:

Type of business	2010	2009
UK Life – dividend income	0%	0%
UK Life – income from assets backing life annuities	0%	0%
UK Life – other income	20%	20%
UK Life – unit linked gains	20%	20%
UK Pensions – all income	0%	0%
UK Pensions – all gains	0%	0%

- (11) Derivative contracts are held by the company. There are inflation hedge swaps, interest rate swaps and total bond return swaps. The cashflows expected to arise from derivatives are projected assuming the current yield curve (in line with the statutory valuation scenario). The valuation yield is derived from the IRR on the combined cashflows from fixed interest securities and derivatives.
- (12) With effect from 31 December 2006, allowance has been made as a result of changes in the valuation rules introduced by INSPRU for non-attributable expenses on property linked business. The reduction in the mathematical reserves caused by these valuation methodology adjustments as at 31 December 2010 are:

Allowance for non-attributable expenses: £1.4 million

Options and guarantees

5. (1) (a) **Capital Pension Plan**

These policies have guaranteed annuity rates available for converting the cash sum available at normal retirement age to an annuity. The reserve for this guarantee is calculated as the uplift required based on the ratio of the value of the annuity on the valuation basis and the value of the annuity on the guaranteed basis.

- (b) Table detailing guaranteed annuity rate option reserves:

Product Code	555
Product name	Capital Pension Plan
Basic reserve, £000	27,688
Spread of outstanding durations	Gradual run-off mean term to vesting date of 3.5 years. Vesting assumed at age 60 or immediately if older.
Guarantee reserve, £000	Included in basic reserve shown above
Guaranteed annuity rate (% of cash sum for 65 year old male ⁽¹⁾)	10%
Increments allowed	No
Form of the annuity	See note 2
Retirement ages	Normal Retirement age under the scheme is normally between 60 and 70

Notes:

1. The guaranteed annuity rate shown has been based on a single life, monthly in advance, level annuity with a five-year guaranteed period. Other forms of annuity will have different guaranteed rates.

2. Guaranteed annuity rates are available for the following forms of annuity: Single life, monthly in advance, Level, 3%, 4% or 5% escalation, five-year guarantee period.

(2) (a) **With Profit Bond Series 5, 6 and 7**

A guarantee that at the tenth policy anniversary no market value reduction will be applied on surrender applies to all With Profit Bond Series 5 policies and With Profit Bond Series 6 and 7 where an option was selected at outset. The units are accumulated to the tenth policy anniversary at the appropriate reversionary bonus rates and discounted at the valuation interest rate. It is assumed that all policies will surrender at the tenth policy anniversary.

(b) Table detailing guaranteed surrender value reserves

Product Code	500	500
Product name	With Profit Bonds Series 5 (in force for less than ten years)	With Profit Bonds Series 6 and 7 (with option)
Basic reserve, £000	176	65
Spread of outstanding durations	All future anniversaries in 2010 and 2011	All future anniversaries in 2011
Guarantee reserve, £000	Included in basic reserve shown above	Included in basic reserve shown above
Guaranteed amount, £000	182	76
MVR free conditions	10 th policy anniversary	10 th policy anniversary
In force premium, £000	All single premium	All single premium
Increments allowed	No	No

Notes:

The guaranteed amount shown is the full current surrender value without any market value reduction applied. Note that most With Profit Bond Series 5 contracts in force passed their tenth policy anniversary in 2008.

The only investment performance guarantee is that the value of units invested in any of the Deposit Funds that place money on short-term deposit is guaranteed not to fall. No additional provision is required as the assets backing these funds will not fall in value.

There are no other guaranteed surrender or unit-linked maturity values.

- (3) (a) There are guaranteed insurability options under a number of products including endowment assurances, group life, life cover attached to Executive Pension Plans and convertible term assurances. The options under endowment assurances life cover attached to Executive Pension Plans allow for increases in amounts assured to be increased whereas the options under group life and convertible term assurances are options to replace existing cover by a cover of longer term (possibly whole of life).

(4) **Pension Transfer Plan**

These policies have a guarantee to pay the Guaranteed Minimum Pension ("GMP") at normal retirement age. The reserve for this guarantee is calculated as the projected

shortfall (if any) in the policies' fund-based maturity values compared to the value of the GMP at normal retirement age on the valuation basis.

The projection uses a closed-form stochastic method to calculate a time value in addition to the intrinsic value of the guarantee to reflect future interest rate volatility.

Table detailing guarantee reserves:

Product Code	155, 525, 725
Product name	Pension Transfer Plan
Basic reserve, £'000	308,306
Spread of outstanding durations	Gradual run-off mean term of 13.58 years
Guarantee reserve, £'000	63,699
Increments allowed	No
Form of the annuity	Varies from policy to policy
Retirement ages	Normal Retirement Age under the policy, usually between 60 and 70

Expense reserves

6. (1) The aggregate amount of expense loadings, grossed up for taxation where appropriate, expected to arise during the 12 months from the 'valuation date' are as follows:

Homogeneous Risk Group	Implicit Allowances £M	Explicit Allowances (Investment) £M	Explicit Allowances (Other) £M	Non-attributable Expenses £M	Total £M
Non-unitised business	0.8	0.12	3.23	0.10	4.26
Unitised business	0.0	1.75	17.16	1.46	20.88
Total	0.8	1.87	20.90	1.55	25.13

- (2) Selected non-linked, non-profit business has been valued using the net premium method of valuation. The implicit allowance for expenses has been taken as the difference between the office premium and the net premium calculated on the valuation basis. Where the net premium on the valuation basis is greater than the actual office premium, the premium valued is the office premium. For classes of business where the difference between the office premium and the net premium is considered insufficient to cover future expenses an additional reserve has been established.

Investment expense allowances are implicitly calculated by a margin in the valuation interest rate.

- (3) The difference between the allowance for maintenance expenses shown above and those shown in Form 43 is partly in respect of annual management charges payable to NPI Limited in respect of reassured incremental UWP policies. The remainder is due to one-off expenses incurred during the year and run-off of business.
- (4) National Provident Life Limited has ceased to write new business, except for increments on existing policies, which are reassured to NPI Limited. No new business expense overrun reserve is held due to the management services agreement in place with Pearl Group Services Limited.
- (5) The company is largely closed to new business and the expense charges paid to Pearl Group Services Limited are determined by the Schedule 2C scheme from the demutualisation of National Provident Institution. No additional expense reserve is required in respect of these expenses.
- (6) The non-attributable expenses includes the reserve held to cover overhead costs (such as audit fees) met by the long term business fund in future years. The reserve assumes costs continue over the next 19.5 years (except the reciprocation costs which we assume run for 10 years), annual growth of 4.6% per annum, and discounted at 3.7% per annum. The term of 19.5 years is consistent with section 33 of the Scheme that allows wind up of the with-profit fund when the with-profit liabilities fall below £500 million subject to increases in RPI since January 2000. However this additional reserve has been reduced to allow for such costs hypothecated to unitised business being, where possible, covered by any remaining margins in the valuation basis.

Homogeneous Product Group	Non-attributable expenses reserve £M
Non-Unitised Business	2.0
Unitised Business	29.0

Mismatching reserves

7. (1) The liabilities are sterling liabilities.

The following table shows the sum of the mathematical reserves (other than liabilities for property linked benefits), analysed by reference to the currencies in which the liabilities are expressed to be payable, together with the value of the assets, analysed by reference to currency, which match the liabilities:

Currency	Liabilities £m	Assets £m
Sterling	2,959.5	2,959.5
Euro	0.0	0.0
Total	2,959.5	2,959.5

- (3) No currency mismatch reserve is held. A Euro exchange forward is held to minimise the currency risk from the non-Sterling assets.
- (4) - (6) National Provident Life Limited is not a regulatory-only basis company and therefore not required to hold resilience capital.

Other special reserves

8. Securitised loan reserve

National Provident Life Limited has a securitised loan that is secured on future profits arising on a defined basis from specific unit-linked and unitised with-profit business within National Provident Life Limited. This provision is equal to the discounted value of further interest and capital payments due to bondholders under the securitisation to the extent that payments exceed the value of surpluses that may be expected to arise from the securitised business based on the valuation assumptions. The amount of this reserve is £82.9 million.

Reinsurance

9. (1) There were no reinsurance arrangements on a facultative basis in force at any time during the period of the report with any company not authorised to carry on insurance business in the United Kingdom.
- (2) The following financing arrangement was in force at the valuation date:
- | | |
|---------------------------------|--|
| (a) Issuer | Mutual Securitisation plc |
| (b) Nature and extent | £260 million of debt capital was raised in 1998, securitised against a specified fixed block of unit-linked, unitised with-profit and capital account business. Interest and principal payments are made from surpluses emerging from this block of business as defined in the securitisation agreement. |
| (c) Premiums paid in 2010, £000 | No premiums are payable. A repayment of interest and principal of 26,813 was made in 2010. |
| (d) Deposit back | Not applicable |
| (e) Open or Closed | Closed |
| (f) Undischarged obligations | The undischarged obligation was £147 million at the valuation date. |
| (g) Reserves ceded £000s | Not applicable |
| (h) Retention for new business | Not applicable |
| (i) | Mutual Securitisation plc is not authorised to carry on insurance business in the United Kingdom. |
| (j) | Mutual Securitisation plc is not a connected company of the insurer. |
| (k) | There are certain specified events where the bond trustee may demand immediate repayment of the loan. |
| (l) | Refund of reinsurance commission is not applicable to this arrangement. |
| (m) (i) | National Provident Life is required to make interest and principal payments from surplus emerging as defined under the agreement. |
| (m) (ii) | A reserve is held for the future repayments in excess of emerging surplus under this arrangement as described in Section 8. The existence of the agreement has the impact of improving the regulatory peak solvency position to the extent that the additional capital exceeds the Securitised Loan Reserve. |

The following other treaties were in force at the valuation date:

(a) Reinsurer	Pearl Assurance plc	NPI Limited	NPI Limited	Pearl Assurance plc
(b) Nature and extent	Pensions Annuities written prior to 1/1/2000 are fully reassured except for the expense of administration.	Unit Linked funds on policies written prior to 1/1/2000 are ceded as investment-only reinsurance.	All new policies and increments written from 1/1/2000 except conventional with-profit business are fully reassured on original terms.	Portfolio Bond policies written 1 July 1999 to 31 December 1999 are fully reassured on original terms.
(c) Premiums paid in 2009 £000s	Nil	72,167 in aggregate to NPI Limited		Nil
(d) Deposit Back	Nil	Nil	Nil	Nil
(e) Open or closed	Closed	Open	Open	Closed
(f) Undischarged obligations	Expenses of administration	This is investment-only reinsurance	Nil – this is original terms reinsurance	Nil – this is original terms reinsurance
(g) Reserves ceded £000s	693,475	1,565,184	1,248,640	17,093
(h) Retention for new business	Not applicable	Not applicable	Nil	Nil

- (j) Both Pearl Assurance plc and NPI Limited are authorised to carry on insurance business in the UK.
- (k) Both these companies are connected companies of the insurer, all three of which are since 13 April 2005 members of the Pearl Group Limited, having previously been part of HHG plc.
- (l) There are no material contingencies under any of these treaties;
- (m) There is no provision to refund any reinsurance commission, except under the reinsurance covering new policies and increments. Any refund under that arrangement would be matched by a reclaim of commission from the seller of the insurance.

Reversionary (or annual) bonus

10. (1) The following tables set out the annual bonus rates for each class of business:

Compound Bonus

Bonus series	31.12.2010	31.12.2010	31.12.2009	31.12.2010	Product code
	Basic mathematical reserve	Reversionary bonus	Reversionary bonus	Total guaranteed bonus	
	£000	%	%	%	
Life Unitised With-profit Series 1	81,181	3.00%	3.00%	3.00%	500
Life Unitised With-profit Series 2 to 7	112,956	0.00%	0.00%	-	500
Portfolio Bond 1	18,560	1.00%	1.00%	-	500
Pensions Unitised With-profit Series 1	1,798,169	0.00% (1) 4.00% (2)	0.00% (1) 4.00% (2)	0.00% (1) 4.00% (2)	525, 535
Pensions Unitised With-profit Series 2 (PRA, FIP, PPP & FSAVC)	95,577	0.00% (1) 0.00% (2)	0.00% (1) 0.00% (2)	- -	525, 535, 570
Pension Capital Accounts (EPP & PTP)	49,566	0.00% (1) 1.75% (2)	0.00% (1) 0.00% (2)	- -	525, 535
Pension Capital Accounts (GMP VGPPP, Penfund and TTP)	11,762	0.00% (1) 1.75% (2)	0.00% (1) 0.00% (2)	- -	535
Deposit administration (VGF, CPP and Plan32)	30,616	1.75%	0.00%	-	545 555
Life Conventional With-profit	24,331	0.00%	0.00%	-	100, 120, 165, 205
Profit Sharing Account (EPP and PTP)	354,761	0.00%	0.00%	-	155

Notes:

1. Bonus rate applies to initial units where applicable.
2. Bonus rate applies to ordinary units where applicable.

The basic mathematical reserves in the above tables are the gross mathematical reserves calculated in accordance with paragraph 4 and exclude the special reserves and capital requirements detailed in paragraphs 5 to 8.

NATIONAL PROVIDENT LIFE LIMITED

APPENDIX 9.4A

ABSTRACT OF VALUATION REPORT FOR REALISTIC VALUATION

Introduction

1. (1) The date to which the actuarial investigation relates is 31 December 2010.
- (2) The date of the previous valuation was 31 December 2009.
- (3) Since the previous valuation date, an interim valuation was carried out at 30 June 2010 for the purposes of rule 9.3A.

Assets

2. (1) A market-consistent valuation was used to determine the value of future profits on non-profit insurance contracts written within the National Provident Life Limited Fund. The zero coupon curve used for this valuation as at 31 December 2010 is set out below, together with comparative figures as at 31 December 2009:

Implied zero curve (gilts + 10bp)		
Year	Zero curve	
	31 December 2010	31 December 2009
1	0.73%	0.97%
2	1.12%	1.60%
3	1.64%	2.19%
4	2.12%	2.70%
5	2.51%	3.12%
10	3.79%	4.35%
15	4.37%	4.80%
20	4.58%	4.86%
25	4.60%	4.78%
30	4.54%	4.69%
35	4.45%	4.61%
40	4.36%	4.54%

- (2) Not applicable.
- (3) Not applicable.
- (4) Not applicable.
- (5) Not applicable.

With-profit benefits reserve liabilities

3. (1) A retrospective method has been used to calculate the with-profit benefits reserves for all significant classes of with-profit insurance contracts. This method is the calculation of an asset share.

Method 1: For conventional with-profit policies the asset shares are calculated by accumulating the premiums paid at the investment return applicable to the with-profit fund, less the expenses incurred. Deductions are made for tax where applicable. An adjustment is made for the expected death strains or surpluses where applicable. No other "miscellaneous" surpluses are credited to the asset shares as these accrue to the Estate.

Method 2: For unitised with-profit, capital account and deposit administration policies the asset shares are calculated by accumulating the allocated premiums (i.e. after the allocation rate and the bid-offer spread have been applied) at the investment return applicable to the with-profit fund. Deductions are made for the charges that would apply on the unit-linked counterpart of the product.

The following table shows the method used to calculate the with-profit benefits reserve for each class of product and the amount of the with-profit benefits reserve and the future policy related liabilities for each class:

Product class	With-profit benefits reserve, £m	Future policy related liabilities, £m
Conventional with-profit life	14	8
Conventional with-profit pensions	201	238
Accumulating with-profit	1665	417
Capital Account/Deposit Administration	93	5
Total	1,974	669

- (2) The future policy related liabilities shown at line 49 in Form 19 also include allowance for financing costs of £272 million and £37 million of other long-term insurance liabilities.
- (3) Not applicable.

With-profit benefits reserve – retrospective method

4. (1) (a) 100% of the with-profit benefits reserve that has been calculated using a retrospective method has been calculated on an individual basis.
- (b) Not applicable.
- (c) Not applicable.
- (2) (a) For conventional endowment products a deduction or credit has been made to the with-profit benefits reserve for the expected death strains or surpluses arising from the difference between the amount payable on death and the with-profit benefits reserve. These deductions/credits are calculated annually using AM/F92 mortality factors. This change brings the calculation of the with-profit benefits reserve into line with the actual asset share calculations to determine payouts in line with the Principles and Practices of Financial Management.
- (b) Not applicable.
- (3) The Scheme of Transfer effected at the time of the demutualisation, 1 January 2000, specifies the calculation basis for determining the aggregate expenses to be charged to the fund in respect of administration and investment management. The administration expenses are expressed as an amount per policy or per benefit, with the policy and benefit counts calculated as at 1 July each year. Investment management expenses are expressed as a percentage of funds under management. Expenses that are not deemed to be administration or investment management expenses can only be charged to the fund if deemed appropriate by the National Provident Life Limited Actuarial Function Holder.
- (a) The calculation of the administration expenses chargeable to the fund was last performed as at 1 July 2010.
- (b) The calculation of the administration expenses chargeable to the fund is performed annually.

(c) (i) No expenses were identified as initial expenses.

(ii) A table of maintenance expenses allocated to the with-profit benefit reserves during 2010:

	Maintenance expenses, £m	Investment management expenses, £m
Conventional with-profit life	0.24	0.01
Conventional with-profit pensions	0.73	0.14
Accumulating with-profit	8.89	1.16
Capital Account/Deposit Administration	0.57	0.0
Total	10.4	1.3

The maintenance expenses above are in line with Schedule 2C scheme.

(iii) For products where the with-profit benefits reserve is calculated using method 1 above, the expenses charged to individual with-profit benefits reserves are the maintenance expenses expressed as per policy amounts, together with investment management expenses expressed as a percentage of the with-profit benefits reserves. The maintenance expenses vary by product line, as set out in the Scheme of Transfer.

For products where the with-profit benefits reserve is calculated using method 2 above, an allowance for expenses is made through the annual management charge expressed as a percentage of the with-profit benefits reserves rather than the per policy amount set out in the Schedule 2C scheme.

(iv) The following table shows the expense amounts charged to the fund in addition to the administration expenses and investment management fees. None of these expenses were charged to the with-profit benefits reserves.

	Additional expenses, £m
Audit fees	0.305
Regulatory fees	0.209
Securitised loan/Bank of Ireland administration costs	0.442
Fees for independent members of the Supervisory Board	0.002
Salary for the AFH plus secretary	0.240
Charges including professional indemnity fee	0.024
Reciprocation costs with Premier Pension Trustees on business within NPLL	0.030
Total	1.252

(4) A charge of 2% was deducted from the with-profit benefits reserves during the financial year and held in an earmarked account in accordance with the management actions described below. Smoothing charges of £7 million were deducted from the with-profit benefits reserves during the financial year.

- (5) No charges were deducted from the with-profit benefits reserves in respect of non-insurance risk.
- (6) The ratio of the total claims paid on with-profit insurance contracts to the with-profit benefits reserves plus (or minus) any past miscellaneous surplus (or deficit) attributed to those claims were 102% for 2010.
- (7) The investment return (before tax and expenses) allocated to the with-profit benefits reserve (other than Capital Account and Deposit Administration business) in respect of the financial year was 4.46%. The investment return allocated to the with-profit benefits reserve for Capital Account and Deposit Administration business in respect of the financial year was 13.68%. The investment return in respect of Capital Account and Deposit Administration business is calculated from the assets hypothecated to that business.

With-profit benefits reserve – prospective method

- 5. (1) Not applicable.
- (2) Not applicable.

Cost of guarantees, options and smoothing

- 6. (2) (a) The cost of all guarantees, options and smoothing have been calculated using a full stochastic model approach.
- (b) (i) None
- (ii) 100% of the with-profit insurance contracts for which costs have been valued have been valued on a grouped basis.
- (iii) The individual policies have been grouped in a manner consistent with the methods used in practice to determine reversionary and terminal bonuses and MVAs. There are separate groupings for product lines that have separate bonus series or have separate terminal bonus scales. Product lines where the terminal bonus scales are determined in practice according to the policy year of entry are grouped accordingly.

The following table sets out the grouping criteria used for each product class:

Product class	Grouping criteria
Conventional with-profit life	Entry year and maturity year
Conventional with-profit pensions	Entry year, maturity year, age at maturity and premium payment type
Accumulating with-profit life	Entry year
Accumulating with-profit pensions	Maturity year and age at maturity
Capital Account	Maturity year and age at maturity
Deposit Administration	Maturity year

In total there are 295,179 individual policies and members of group schemes, which have been grouped together into 19,853 model points.

The grouping is validated by comparing the cost of guarantees from the business using grouped data with those obtained using the individual policy data.

- (c) Not applicable.
- (3) Not applicable.

(4) (a) (i) The main contractual guarantee costs valued are:

Lump sum benefits, where the sum assured and attaching reversionary bonuses, plus any guaranteed or discretionary future reversionary bonuses, payable either at maturity, death or at points where no MVA can be applied. Some of these guarantees are in the money and others are out of the money, depending on the date that the premium was paid.

The Pension Transfer Plan product includes, for a large proportion of cases, a commitment to pay a pension of at least the amount of the attaching Guaranteed Minimum Pension. These guarantees are largely in the money.

The non-contractual guarantee costs valued are:

The Mortgage Endowment Promise where National Provident Life Limited will pay an amount at least equal to the mortgage the policy was originally taken out to cover, subject to certain conditions on the fund's investment performance. These guarantees are largely in the money.

The costs of financial options relate to:

Guaranteed annuity rates applying on Deposit Administration business, where a guaranteed annuity rate specified in the contract can be applied at retirement to convert the cash benefits into annuity benefits. Generally, these annuity rate guarantees are in the money.

There are no smoothing costs assumed in accordance with National Provident Life Limited's policy of targeting payouts at 100% of asset share.

(ii) The asset model assumes that:

The asset model used was the Barrie & Hibbert market consistent asset model which assumes that:

The interest rate calibration process is as follows:

- Interest rates follow an annual LIBOR market model on gilts + 10 basis points.
- The initial yield curve is a direct input to the LIBOR Market Model. The model calibration is based on the market spot rates and swaption volatilities. The interest rate volatilities are calibrated to swaption implied volatilities. The fitting method is weighted least squares over the swaption volatility surface.
- The equity model has been calibrated to implied volatilities on at-the-money FTSE options. As equity returns are calculated in excess of the short-term interest rate, the stochastic interest-rate model introduces a term structure of implied volatility (even though the excess volatility is fixed).
- It is not currently possible to observe meaningful option prices for the property market from which implied levels of property volatility can be derived. A real world estimate of levels of volatilities has therefore been used in the market-consistent calibration. Ideally, the volatility parameter would be set to reflect the prices of long-term at-the-money property options. However, since this market is in its infancy, the parameter has been set to 15% based on analysis of historic volatility of property indexes. As property returns are calculated in excess of the short-term interest rate, the stochastic interest rate model introduces a term structure of implied volatility (even though the excess volatility is fixed).

- The corporate bond process is calibrated using real world unconditional estimates of long term transition probabilities, spread volatilities and corporate bond spreads at 31 December 2010. To fit the model, the fit is targeted to a 7 year A rated bond only.

The following table shows the market data used to calibrate the equity process.

Implied volatility of at the money FTSE-100 put options (%)					
Option Term	1 year	2 years	3 years	4 years	5 years
31 December 2010	20.60%	22.00%	23.00%	23.50%	24.30%

Source: Barrie and Hibbert

The correlation assumptions used are listed in the table below. These assumptions are set based on historic data on the correlation between equity and property and long dated bond price movements, rather than derived directly from market instruments, as there are few instruments whose price is significantly affected by the assumption.

Correlation factors between asset classes				
	Equity	Property	Government bonds	Nominal short-rate
Equities	100%	35%	16%	-15%
Property		100%	10%	-10%

Source: Barrie and Hibbert

- (iii) The following table shows the annualised compound equivalent of the risk free rate assumed for each duration and values derived from the asset model of specified assets/options:

	Asset type (all UK assets)	K=0.75					K=1					K=1.5					
		5	15	25	35	5	15	25	35	5	15	25	35	5	15	25	35
n																	
r	Annualised compound equivalent of the risk free rate assumed for the period (to two decimal places)	2.52%	4.37%	4.59%	4.45%	x	x	x	x	x	x	x	x	x	x	x	x
1	Risk-free zero coupon bond	883	527	325	218	x	x	x	x	x	x	x	x	x	x	x	x
2	FTSE All Share Index (p=1)	110	244	345	422	217	391	520	611	553	747	907	907	553	747	907	1,015
3	FTSE All Share Index (p=0.8)	104	198	251	285	205	318	380	416	524	613	672	672	524	613	672	698
4	Property (p=1)	35	108	180	237	138	242	334	404	520	616	714	714	520	616	714	793

6	15 year risk free zero coupon bonds (p=1)	17	17	11	19	87	83	83	120	500	499	502	502	500	499	502	524
7	15 year risk free zero coupon bonds (p=0.8)	15	9	3	2	77	41	17	17	464	324	227	227	464	324	227	195
8	15 year corporate bonds (p=1)	25	36	34	46	105	119	120	149	491	483	487	487	491	483	487	516
9	15 year corporate bonds (p=0.8)	22	20	13	11	94	72	47	44	456	329	242	242	456	329	242	215
10	Portfolio of 65% FTSE All Share and 35% property (p=1)	68	168	251	321	165	301	409	495	523	653	783	783	523	653	783	885
11	Portfolio of 65% FTSE All Share and 35% property (p=0.8)	63	129	169	200	153	234	281	315	491	518	553	553	491	518	553	578
12	Portfolio of 65% equity and 35% 15 risk free zero coupon bonds (p=1)	58	142	210	275	151	266	360	441	512	613	726	726	512	613	726	821
13	Portfolio of 65% equity and 35% 15 risk free zero coupon bonds (p=0.8)	53	107	136	164	139	202	239	270	479	478	500	500	479	478	500	522
14	Portfolio of 40% equity, 15% property, 22.5% 15	34	85	132	183	117	195	264	331	501	549	626	626	501	549	626	702

15	year risk free zero coupon bonds and 22.5% 15 year corporate bonds (p=1)	30	58	74	92	105	137	156	178	466	407	398	407
	Portfolio of 40% equity, 15% property, 22.5% 15 year risk free zero coupon bonds and 22.5% 15 year corporate bonds (p=0.8)												
		L=15			L=20			L=25					
16	Receiver swaptions	5.64%	5.94%	5.52%	4.28%	6.88%	7.46%	6.75%	5.08%	8.13%	8.78%	7.71%	5.64%

Note: The values in the above table were produced using the stochastic scenarios used to derive the realistic balance sheet with one exception; the corporate bond scenarios used to derive the values in the table are consistent with those used to determine the realistic balance sheet, but have been calibrated to AA corporate bonds. The actual scenarios used to determine the realistic balance sheet reflect the average credit quality of the corporate bond portfolio.

The values in the above table are in units of '000.

- (iv) For the purposes of calculating a net of tax return, the equity dividend yield has been set to 3.61% and the property rental yield to 3.61%.
- (v) For the purposes of INSPRU 1.3.63R there are no significant overseas territories.
- (vi) The average outstanding durations of significant guarantees by main product type are shown in the table below:

Product type	Outstanding duration of guarantees (years)
Endowments	3
UWP	10
Profit Sharing Account	6
Capital Account/Deposit Administration	5

The fit of the asset model to specimen swaptions and put options is demonstrated below:

Ratio of simulated swaption values to pseudo swaption prices		
Option maturity	Swap length	
	10 years	15 years
10 years	112.52%	111.19%
15 years	106.52%	105.26%

Note: The figures are based on swaptions consistent with the gilts + 10bp risk free rate and market swaption volatilities as opposed to swap rates and swaption volatilities.

As the guarantees are most significant for the UWP business, the table above demonstrates that the scenarios can be used to reproduce market prices of swaptions at the average outstanding durations of significant guarantees.

- (vii) It was demonstrated that the scenarios used are arbitrage free up to suitable simulation error. In a market-consistent model, the expected value (or average discounted value) of £1 invested in a traded asset (e.g. cash, bonds or equities) equals £1 (the "one=one" test). For assets other than corporate bonds, the observed error was small and the scenarios are considered to have passed the no-arbitrage test. For corporate bonds, this test was further away, but further investigations have indicated that this did not have a material impact on the overall results.
 - (viii) In addition the validation process performed a further test to check that the market prices of relevant traded instruments can be replicated. This validation test requires that the scenarios themselves can be used to reproduce (by stochastic simulation) market prices. This was tested separately for swaptions, equity options and the initial yield curve. The observed errors are small, showing that the simulation process does not introduce significant additional error over and above that arising from the calibration process. It is not possible to illustrate the fit of the property scenarios to market data; however, the fit of the property volatility assumption has also been validated.
- (b) Not applicable.
 - (c) Not applicable.
- (5) (a) The management actions implemented within the model as at 31 December 2010 stipulate that any asset share charge in each year would be equal to any realistic basis deficit assuming no management actions were to be applied. For the purpose of realistic balance sheet, we have assumed an annual maximum charge of 2% of asset shares (subject to an overall cap of 25%). No other management actions were assumed.

Any charges to asset shares will be accumulated in a separate account, the "management action account", which will not be used to pay for guarantees unless the overcoat has been exhausted. The management action charge account could also be used to pay for the financing costs, but only if the cash estate is exhausted.

This treatment of charges means that the balance of the management action account would be rebated to asset shares if it later became apparent that the prior year's charges had been too large. The management action account is considered as a contingent liability; effectively an amount payable to asset shares and hence to policyholder benefit.

- (b) The estimated proportions of equities (both UK and non-UK) backing the with-profit benefits reserves are as follows:

	31 December 2010	31 December 2015	31 December 2020
Proportion of equities backing with-profit benefits reserves	0%	0%	0%

These proportions apply in each of the three scenarios.

Current reversionary bonus rates on UWP Life business are 3% on Series I units and 4% on Series II to Series VII units. Current reversionary bonus rates are 2% on Pensions UWP Series I ordinary units and 2.85% on both Pensions UWP Series I initial units and Series II ordinary units. These rates are not expected to change in the future and the modelling assumes that this is the case.

- (6) Persistency assumptions used to determine the costs of guarantees, options and smoothing are set out in the table below:

Product		Average lapse / surrender / paid up rate for the policy years
		<u>All Durations</u>
CWP savings endowment	surrender	2.50%
CWP target cash endowment	surrender	2.50%
UWP bond (series 2, 3, 4, 6, 7)	surrender	7.00%
UWP bond	automatic withdrawal	100% of current
UWP ind pension regular premium	PUP	15.00%
UWP ind pension regular premium	surrender	4.50%
UWP ind pension single premium	surrender	4.50%

For other products retirements are assumed to take place at the no-MVA date (normally 65) unless the policyholder has specified a particular retirement date.

100% take up rate is assumed on all guaranteed annuity options or guaranteed conversion options.

For With Profit Bond Series 5, where a no-MVA guarantee applies on the 10th policy anniversary, an additional 70% of the policyholders are assumed to surrender their policies at that date.

The annuitant mortality assumptions used are:

Male lives: 97% RMV00 with future mortality improvements in line with the CMI Mortality Projections model v1.0 with a floor of 3% per annum up to age 60 reducing to a floor of 0% per annum at age 110.

Female lives: 107% RFV00 with future mortality improvements in line with the CMI Mortality Projections model v1.0 with a floor of 3% per annum up to age 60 reducing to a floor of 0% per annum at age 110.

- (7) For most product lines the guarantees are currently in the money, and have been so for a number of years. Therefore the persistency assumptions in (6) are appropriate and no additional policyholder actions are warranted.

7. Financing costs

The future policy related liabilities also include allowance for a number of financing arrangements:

Breakdown of financing costs in Form 19 (F19 L45)	
	£m
Securitised loan	171.9
Lower tier 2 subordinated debt	4.8
Shareholder equalisation fund	58.1
Contingent loan	37.3
Financing costs	272.0

1) Securitised loan:

Future profits from a particular block of accumulating with-profit and unit linked business have been securitised. The repayments follow a fixed payments schedule until 2023 and are met from the surplus arising on the securitised block of business. The nominal amount outstanding currently stands at £147 million, which includes interest payments calculated at 7.40169% and 7.59730% for the Class A1 and A2 bonds respectively. The stochastic model tests whether the surplus on the appropriate classes of business is sufficient to meet the scheduled payment, and the cashflows are then discounted using the scenario specific discount rates. The expected market consistent value of the amounts to be repaid is £172 million.

2) Contingent loan:

At the time of the demutualisation in December 2000, £800 million of capital support, was provided by Pearl to the National Provident Life Limited Fund.

Repayments of capital and of the accumulated investment return are made according to a formula in the Scheme, but only to the extent that a "deficit" has not arisen. A deficit in this context exists when, and to the extent that, in the opinion of the Actuarial Function Holder, the admissible value of the assets in the long-term fund falls short of the greater of:

- (a) The liabilities in the long term fund; and
- (b) Amounts determined by the Actuarial Function Holder as necessary to be held in the long term fund to meet Policyholders Reasonable Expectations (PRE) and to manage the fund in accordance with the Principles of Financial Management (as described in the Scheme).

Support charges of up to 1.75% per annum are payable provided there is a Form 58 surplus arising or there would be a surplus arising but for the payment of the support charge.

At 31 December 2009 the total 'nominal' balance on the Loan Capital Fund and Transfer Capital Fund was £671.679 million. The actual value of these funds (post any transfers and investment return) at 31 December 2009 was £685.472 million. As part of the transfer of NPLL's SERP business to Pearl Assurance on 4 January 2010, £524.256 million was transferred to Pearl Assurance. Thus, the actual value balance as at 31 December 2010 was £161.216 million (with an associated nominal balance remaining of £157.972 million).

Currently no repayments of capital or of accumulated investment returns are being made.

The stochastic model assumes that repayment occurs in accordance with the rules governing the repayment as set out in the Scheme. The expected amount to be repaid is £6.9 million, this amount excludes the support charges.

The value of the contingent loan of £37.3 million shown above is net of tax on investment income on the overcoat funds of £0.5m. The tax amount is reported in line 47 of Form 19.

3) Shareholder Equalisation Fund

As part of NPLL's transfer of the SERP business, a "Shareholder Equalisation Fund" was established in the long term fund of NPLL. The initial value of the Shareholder Equalisation Fund was determined on a basis defined in the SERP Transfer Scheme and will be released to shareholders over time unless it is required to meet guarantee benefits.

4) Lower tier 2 subordinated debt

The lower tier 2 subordinated debt is the debt of £65 million that was issued on 20 June 2006. The debt is a liability of the shareholder fund but the proceeds of the issue were transferred to the long term fund in the form of an earmarked portfolio. This debt is subject to a financing charge of 4.25% per annum plus the investment return on the assets.

The amount of £4.8 million shown above is the value of the financing costs net of the face value of £65 million. The face value is excluded in the financing cost as this subordinated debt is treated as part of the earmarked portfolio from the shareholders' fund, and therefore, should not be considered as a liability to the long term business fund.

There is a further financing arrangement within the long term fund, which does not form part of the future policy related liabilities.

5) Earmarked portfolio:

The earmarked portfolio is a pool of assets provided by the shareholder, including the proceeds of the 2006 subordinated debt which have been placed in the long-term fund. This portfolio is not available for distribution to the with-profit policyholders as distributable estate.

8. Other long-term insurance liabilities

The amount in Form 19 line 47 represents liabilities in respect of:

- additional overhead expenses;
- the reserve in respect of outstanding premiums;
- the reserve in respect of MVAs on Portfolio Bond 1 switches on business reassured to Pearl Assurance plc where the National Provident Life Fund cannot pass this cost onto the policyholders; and
- the potential amount of future tax and investment expenses charged to the estate.

9. Realistic current liabilities

The regulatory current liabilities comprise of the other current liabilities as reported within Form 14 lines 17 to 41.

The realistic current liabilities shown at line 51 of Form 19 are the same as the regulatory current liabilities except for a reduction by the accruals in respect of the financing arrangements, to the extent that these are included in the stochastic model.

The reconciliation of realistic to regulatory current liabilities is shown below:

	£m
Regulatory current liabilities	614.1
less subordinated debt accrual	1.9
less securitised loan accrual	3.0
Realistic current liabilities	609.2

10. Risk capital margin

- (a) The risk capital margin for National Provident Life Limited at 31 December 2010 was £83.2 million.

The most onerous scenario for National Provident Life Limited is that which combines:

- (i) The percentage changes in the market value of equities and real estate for the purposes of the market risk scenario for UK assets were 20% and 12.5% respectively. A fall in the market value of these assets was the more onerous in each case.

There were no significant territories for the purposes of INSPRU 1.3.62R(1)(b).

- (ii) The nominal change in yields assumed for fixed interest securities for the purpose of the market risk scenario for UK assets was 0.70%. This represented a change of 17.7% in the level of the long-term gilt yield from a level of 3.95%. A fall in the level of yields was the more onerous change.

There were no significant territories for the purposes of INSPRU 1.3.62R(1)(b).

- (iii) The average increase in spread for bonds (weighted by value) that resulted from applying the credit risk scenario to the with-profit sub fund's assets was 62 basis points.
- (a) The change in value for the with-profit sub fund bond assets was a 3.33% rise in asset value.
- (b) Not applicable.
- (c) Not applicable.
- (d) Not applicable.
- (e) The change in value for the with-profit sub fund other assets was a 78.8% fall in asset value.
- (iv) The persistency risk scenario resulted in a 1.18% increase in the realistic value of liabilities.
- (v) Not applicable.
- (b) (i) No additional management actions other than those described in 6(5)(a) above were assumed for the purposes of calculating the risk capital margin.
- (ii) Not applicable.
- (iii) Not applicable.
- (iv) Not applicable.
- (c) (i) Assets within the long-term fund cover £81.6 million of the risk capital margin.

- (ii) The assets of the Shareholder Fund are available to support the solvency of the long-term fund. Should the working capital become negative, shareholder assets would be transferred into the long-term fund, in an Earmarked Portfolio subject to an undertaking given by National Provident Life Limited to the FSA. As at 31 December 2010 the Earmarked Portfolio stood at £158.5 million.

11. Tax

- (i) For assets backing the with-profit benefits reserve, policyholder taxes are calculated on an "I-E" tax basis applicable to BLGAB business and deducted from the with-profit benefit reserve. The tax rate assumed was 20% on savings income, rental income and indexed capital gains. Tax relief on expenses has been assumed to be at 20%. No tax is assumed on pensions business.
- (ii) Allowance is made for the "I-E" tax due on assets needed to back the excess of realistic liabilities over and above the with-profit benefits reserve and is included in the other long term insurance liabilities shown in Form 19 line 47.
- (iii) The allowance made for tax on the assets backing realistic current liabilities is similar to that outlined in (ii) above.

12. Derivatives

The fund holds a number of interest rate receiver and payer swaps executed with UBS, Deutsche Bank, Morgan Stanley, Barclay's Capital and RBS. The table below contains a summary of the trades.

Security name	Nominal amount £s	Pay/Receive	Strike level %	Maturity date
DB Swaps	9,820,000	Receive	4.0879	27/05/2034
UBS Swaps	-164,000,000	Pay	4.338	17/12/2036

13. Analysis of working capital

The following table sets out the significant movements in the working capital, shown in Form 19 line 68, from 31 December 2009 to 31 December 2010.

	£m
Working capital at 31 December 2009	112
Restatement changes:	
Impact of restructuring SERP	(0.1)
Methodology changes:	
Impact of new model	6.0
Impact of new ESG	3.0
Impact of AS charge cap	(5.0)
Basis change:	
Updated post-vesting mortality	(0.2)
Updated surrender assumption	(28.1)
Updated expense and inflation assumption	(3.3)
Roll forward	
Expected RF position including investment and decrements	7.0
Investment returns variance:	
Equity variance	(0.0)
Property variance	4.3
Variance on fixed interest assets	(19.8)
Variance due to change in credit spreads	3.2
Miscellaneous	
Actual policy movements differing from expected	1.3
Miscellaneous movements in the cash estate	2.3
Unexplained	(0.5)
Working capital at 31 December 2010	81.6

14. Optional disclosure

Not applicable.

Returns under the Accounts and Statements Rules

Statement of information on the actuary who has been appointed to perform the with-profits actuary function as required by rule 9.36

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

The with-profits actuary throughout the period was D Addison. In accordance with rule 9.36 of the Accounts and Statements Rules, the following information relating to Mr D Addison is in respect of the year 2010:

1. a) Mr Addison held no shares or share options in 2010.
b) Mr Addison had no transactions with the insurer throughout 2010.
c) The aggregate of the remuneration and value of other benefits receivable by Watson Wyatt Limited (Towers Watson Limited with effect from 31 March 2010), (the employer of Mr Addison), from the insurer during the period specified was £5,904,988 exclusive of VAT.
d) Mr Addison was not a member of any Phoenix Staff Pension Scheme (National Provident Life Limited being a subsidiary of Phoenix Life Limited) in 2010 and was not entitled to any benefits under the rules of such scheme. Mr Addison did not therefore accrue pension benefits in such scheme throughout 2010.
2. The insurer has made a request to Mr Addison to furnish it the particulars specified in rule 9.36(1) of the Accounts and Statements Rules. The above particulars were obtained with the agreement of Mr Addison.

Note 1

Under rule 9.36(4) of the Accounts and Statements Rules, reference to the insurer includes reference to any body corporate which is the insurer's subsidiary undertaking or parent undertaking and to other subsidiary undertakings of its parent undertaking.

Note 2

Regarding Section 1(c) the remuneration details supplied relate to the contractual sums paid to Watson Wyatt Limited (Towers Watson Limited with effect from 31 March 2010) for the provision of actuarial services. These services include the performance of the with-profits actuary function by Mr D Addison.

Returns under the Accounts and Statements Rules

Certificate required by rule 9.34(1)

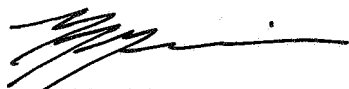

NATIONAL PROVIDENT LIFE LIMITED

Global Business

Financial year ended 31 December 2010

We certify that: -

1. (a) the return has been properly prepared in accordance with the requirements in IPRU(INS), GENPRU and INSPRU; and
(b) we are satisfied that:
 - (i) throughout the financial year in question, the insurer has complied in all material respects with the requirements in SYSC and PRIN as well as the provisions of IPRU(INS), GENPRU and INSPRU; and
 - (ii) it is reasonable to believe that the insurer has continued so to comply subsequently, and will continue so to comply in future.
2. (a) in our opinion, premiums for contracts of long-term business entered into during the financial year and the resulting income earned are sufficient, under reasonable actuarial methods and assumptions, and taking into account the other financial resources of the insurer that are available for the purpose, to enable the insurer to meet its obligations in respect of those contracts and, in particular, to establish adequate mathematical reserves;
(b) the sum of the mathematical reserves and the deposits received from reinsurers as shown in Form 14, constitute proper provision at the end of the financial year for the long-term insurance business liabilities (including all liabilities arising from deposit back arrangements, but excluding other liabilities which had fallen due before the end of the financial year) including any increase in those liabilities arising from a distribution of surplus as a result of an actuarial investigation as at that date into the financial condition of the long-term insurance business; and
(d) we have, in preparing the return, taken and paid due regard to-
 - (i) advice from every actuary appointed by the insurer to perform the actuarial function in accordance with SUP 4.3.13R; and
 - (ii) advice from every actuary appointed by the insurer to perform the with-profits actuary function in accordance with SUP 4.3.16AR.

Note to the Directors' Certificate

1. Principles and Practices of Financial Management

Paragraph 2(c) which relates to the management of the with-profits fund in accordance with the Principles and Practices of Financial Management ("PPFM"), has been omitted from the Return due to certain minor instances where the management of the fund differed from the PPFM but these have not resulted in the unfair treatment of policyholders

Returns under the Accounts and Statements Rules

Independent auditor's report to the directors pursuant to rule 9.35 of the Interim Prudential Sourcebook for Insurers

NATIONAL PROVIDENT LIFE LIMITED

Global business

Financial year ended 31 December 2010

We have audited the following documents prepared by the insurer pursuant to the Accounts and Statements Rules set out in Part I and Part IV of Chapter 9 to IPRU(INS) the Interim Prudential Sourcebook for Insurers, GENPRU the General Prudential Sourcebook and INSPRU the Prudential Sourcebook for Insurers ("the Rules") made by the Financial Services Authority under section 138 of the Financial Services and Markets Act 2000:

- Forms 2, 3, 13 to 19, 40 to 44, 48, 49, 58 and 60 (including the supplementary notes) ("the Forms");
- the statement required by IPRU(INS) rule 9.29 ("the statement"); and
- the valuation reports required by IPRU(INS) rule 9.31 ("the valuation reports").

We are not required to audit and do not express an opinion on:

- Forms 46, 47, 50 to 54, 57, 59A and 59B (including the supplementary notes);
- the statements required by IPRU(INS) rules 9.30 and 9.36; and
- the certificate required by IPRU(INS) rule 9.34(1).

This report is made solely to the insurer's directors, in accordance with IPRU(INS) rule 9.35. Our audit work has been undertaken so that we might state to the insurer's directors those matters we are required by the Rules to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the insurer for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of the insurer and its auditors

The insurer is responsible for the preparation of an annual return (including the Forms, the statement and the valuation reports) under the provisions of the Rules. The requirements of the Rules have been modified by the directions issued under section 148 of the Act, referred to in supplementary note 0201. Under IPRU(INS) rule 9.11 the Forms, the statement and the valuation reports are required to be prepared in the manner specified by the Rules and to state fairly the information provided on the basis required by the Rules. The methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports are required to reflect appropriately the requirements of INSPRU 1.2 and 1.3.

It is our responsibility to form an independent opinion as to whether the Forms, the statement and the valuation reports meet these requirements, and to report our opinion to you. We also report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited; or
- the Forms, the statement and the valuation reports are not in agreement with the accounting records and returns; or

Returns under the Accounts and Statements Rules

Independent auditor's report to the directors pursuant to rule 9.35 of the Interim Prudential Sourcebook for Insurers

NPI Limited

Global business

Financial year ended 31 December 2010

Respective responsibilities of the insurer and its auditors (continued)

- we have not received all the information we require for our audit.

Basis of opinion

We conducted our work in accordance with Practice Note 20 'The audit of insurers in the United Kingdom (revised)' issued by the Auditing Practices Board. Our work included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Forms, the statement and the valuation reports. The evidence included that previously obtained by us relating to the audit of the financial statements of the insurer for the financial year on which we reported on March 2011. It also included an assessment of the significant estimates and judgments made by the insurer in the preparation of the Forms, the statement and the valuation reports.

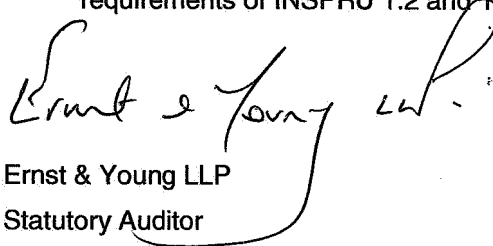

We planned and performed our work so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Forms, the statement and the valuation reports are free from material misstatement, whether caused by fraud or other irregularity or error, and comply with IPRU(INS) rule 9.11.

In accordance with IPRU(INS) rule 9.35(1A), to the extent that any document, Form, statement, analysis or report to be examined under IPRU(INS) rule 9.35(1) contains amounts or information abstracted from the actuarial investigation performed pursuant to IPRU(INS) rule 9.4, we have obtained and paid due regard to advice from a suitably qualified actuary who is independent of the insurer.

Opinion

In our opinion:

- (a) the Forms, the statement and the valuation reports fairly state the information provided on the basis required by the Rules, as modified, and have been properly prepared in accordance with the provisions of those Rules; and
- (b) the methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports appropriately reflect the requirements of INSPRU 1.2 and 1.3.
